Subject: Application for Front End & Web Developer Internship

Dear Hiring Manager

I am writing to express my strong interest in the Front End & Web Developer Internship position at NexMind AI, as advertised on (Malaysia. Indeed platform). With my educational background in Computer Science (Information Security) and my passion for web development, I believe that I possess the skills and enthusiasm necessary to contribute to your innovative team.

As a final year student pursuing a bachelor's degree in computer science (Information Security) at Universiti Tun Hussein Onn Malaysia, I have gained a solid foundation in web development and programming languages such as HTML, CSS, and JavaScript. My experience includes implementing secure web solutions, utilizing encryption techniques, and creating user-friendly interfaces. I am also proficient in database and have a good understanding of PHP.

During my academic journey, I have successfully completed various projects that have honed my technical skills and problem-solving abilities. For instance, I developed a Furniture Ordering System as my final year project with OTP for Alghail shop, which enhanced security and user experience for online furniture shopping. Additionally, I contributed to the creation of a user-friendly Book Borrowing System for UTHM Library, streamlining access to its vast collection of books. These experiences have allowed me to develop a keen eye for detail, a collaborative mindset, and effective communication skills.

I am particularly drawn to NexMind AI's reputation as an award-winning innovation team. I am excited about the possibility of gaining practical work experience, working on challenging projects, and receiving mentorship from experienced professionals.

Please find my attached resume for additional details on my education, projects, skills, and certifications. I would welcome the opportunity to discuss how my skills can benefit NexMind AI. Thank you for considering my application.

Sincerely
Hasan AL-hubaishi
